

Welcome to the **SLICA** way of painting

NO MORE MESSY PAINT TINS

Paint, Pour and Stir using SLICA® and your tins will look as clean as the day you bought them.

WHAT IS SLICA®?

SLICA® is every painter's new best friend.

Just remove the tin's lid and firmly seat SLICA® on top of the tin before you start painting...it's that simple.

SLICA® allows you to access liquids directly from the tin, by a brush or poured without spillage.

Using the built-in **pouring section** and **paint scraper**, you can continually access liquid and simply scrape the liquid from the brush back into the tin without fear of ending up with a messy tin that won't seal properly after use.

No more worrying about the contents spoiling and drying out.

Using the highest quality materials has resulted in a product that is durable and resistant to solvents, oils, paints and other liquids.

SLICA® is easy to clean and designed to be fitted and removed without fuss.

SLICA® fits most 1 and 4 litre Australian made tins and some 32oz tins.

WHY USE SLICA®?

SLICA® stops:

- Paint filled tin channels, resulting in the inability to seal lid correctly;
- Paint covered unreadable labels; and
- Wastage of tin contents.

DIRECTIONS FOR USE

To Fit

- Remove tin lid.
- Place SLICA® on top of tin.
- Using both hands, push SLICA® down firmly to ensure contact.
- Paint, stir or pour from tin.

To Remove

- Place hands around top of tin.
- Push SLICA® upwards using tabs.
- Rinse.

* SLICA is a plastic accessory for use on paint, varnish and oil tins. It is not a toy and should not be used for any other purpose than that specified.
